

*Energy People for
Energy Solutions*

*Manufacturers of LV, MV Switchboards & Control Panels.
Energy & Automation Solutions Provider.*

BUSINESS VERTICALS

Switchboard & Control Panel Manufacturing

Our product range includes

- PCC, MCC Switchboards
- APFC Panels
- Distribution Boards
- Outdoor Feeder Pillars
- DG Synchronising & AMF Panels
- Control & Relay Panels
- PLC Panels
- Drive Panels
- Soft Starters
- Motor Starters
- Process Control Desks
- Mimic & Annunciation Panels.

KPO Services

We offer world-class, industry-standard design and engineering services for project management documentation. We make use of global engineering tools like AutoCAD, E-CAD, and E-PLAN for drawing preparation. Our KPO services include the preparation of the following drawings and documents:

- G.A. Drawings.
- Single Line Diagrams
- Bill of Material
- Wiring Schematics
- Layouts
- Cable Schedules
- Final Design Specifications
- Cost Estimates
- As-Built Drawings.
- CNC Sheetmetal Design and Busbar Design

Licensed Electrical Contractors

We offer premium services to utilities, industries, commercial establishments, and domestic consumers for:

- On-site installation of electrical systems and related equipment.
- On-site testing and commissioning of electrical installations
- Operation and Maintenance of all electrical substation equipment.
- Liasoning with statutory authorities for approvals and permissions .

BUSINESS VERTICALS

Third-Party Contractors

"Workmanship, Quality Performance, and On-Time Delivery" is the success mantra for the contract manufacturing business.

We undertake contract manufacturing for:

- Control panel wiring and assembly
- Custom-designed wire harnessing
- Control System Integration
- Product Manufacturing.
- In-house testing and calibration of equipment.

Training & Developments

We offer basic as well as extensive tailor-made training programmes on energy and automation products for beginners and industry professionals to enhance their technical knowledge and required skill sets. Training include theory sessions, Contemporary presentations, workshop practical & hands-on trainings.

We conduct training programs on:

- Control System Designing.
- System Engineering
- Protection & Relaying.
- Control & Automation
- Equipment Selection
- Testing, O & M of Electrical Equipment.
- Engineering Drawing Preparation.
- Energy Management System

On-site Retrofitting, Modification, and Upgradation Work

We offer onsite services for:

- All types of electrical retrofitting work
- Modification to the existing electrical control system.
- Upgrade of Existing Electrical Equipment and Installations
- We carry out servicing and routine maintenance of existing electrical equipment and installations.
- AMC's for Electrical Systems and Equipment

About Us

- » Kpower Engineering is an upcoming company in the field of energy and automation, formed with the mission to deliver customized, cost-effective, and innovative products and solutions to customers well in time.
- » Kpower Engineering product range includes power switchboards and control and automation panels. Their knowledge, experience, and expertise enable Kpower to offer customized, quality solutions to their customers' various energy and automation needs.
- » The managing partners of the company have 20+ years of rich experience and have executed several varieties of domestic and international projects in diverse industry segments like oil & gas, food, pharma, packaging, printing, material handling, water, metal, power, solar, and infrastructure.

Vision

To be a leading product and solution provider in the fields of energy and automation, globally.

Mission

To deliver customized, cost-effective, and innovative products and solutions to customers well in time.
